

7.13 Environmental Management (BIP1023)

UDAYANA UNIVERSITY

Course Syllabus

Environmental Management and Sustainability (BIP1023)

Graduate Program

5 ECTS

1. Course Description

Sustainability has emerged as a major challenge for societies and businesses worldwide. This course provides an understanding of environmental management and sustainable development in a world where the sufficiency of resources and life-sustaining systems is endangered by human impact. Students will be equipped with an understanding of natural resource management and skills in devising and enacting strategies to protect and conserve the environment, both in Bali and beyond. Issues such as pollution, climate change, and renewable energy are addressed as well as issues in global corporate social responsibility. The course will look into environmentally sustainable business strategies, innovation and environmental leadership and management, and how the environmental and social responsibilities are integrated into the business functions and strategies of the companies.

2. Objectives

Students will learn how sustainability practices are implemented in a cost-effective manner both in public and private sectors. They will also acquire practical knowledge and management skills based on sustainability leadership principles. The students will learn:

- to examine the current state and challenges in environmental issues
- to develop an understanding of sustainable development and management in environmental issues as well as theories and practices
- To develop an ability to demonstrate a solid understanding of the role of businesses, sustainability, and their impact on the world
- to examine environmental policies, politics and legislation
- to understand the implications of unequal distribution of natural resources
- to look into the future of environmental management and sustainability

3. Teaching Methods

The course will be presented in the form of lecture activities, classroom assignment and discussion, case studies, special topic presentation, and homework.

4. Assessment Methods

Assignments:	30%
Mid-Term exam:	30%
Final exam:	40%
